

SUSTAINABILITY POLICY STATEMENT

Dodds Roofing Services Limited recognises the global, regional and local effects of development activities upon society and the environment, and we are committed to actively contributing to the changes in our practice and culture that are needed to reduce the potentially adverse effects of human activity and produce a more sustainable social order.

It is the policy of Dodds Roofing Services to:

- Develop awareness and responsibility of staff, suppliers and clients as to the need for sustainable business practice.
- Sustain continuous improvement in relation to its business, by integrating environmental, social and economic factors into its business decisions.
- Monitor its activities for compliance with relevant legal and other requirements and promote compliance amongst its clients.
- Encourage clients to prevent pollution, reduce resource use and minimise adverse environmental effects of projects in all phases initial planning, design, construction, commissioning, operating and decommissioning.
- Promote and actively support all forms of training and education, including active participation in professional and academic institutions.
- Support involvement in local communities and charitable institutions to further the development of more sustainable business practices.
- Minimise the potential adverse economic, social and environmental effects of it's own office based activities, establish objectives, targets and performance indicators that will be monitored and reported regularly to senior management.

Dodds Roofing Services will regularly review and revise this policy as appropriate.

GRAHAM DODDS
MANAGING DIRECTOR
